DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3,902,000 (Forsyth).

Forsyth discloses, referring primarily to figure 3, a terminal structure of a multiphase superconducting cable, comprising: a multiphase superconducting cable including a plurality of superconducting layers (S1, S2) for flowing currents of different phases, the superconducting layers being concentrically disposed and separated from each other by conductor-insulation layers (spacer p); a refrigerant tank (source) filled with a refrigerant for cooling the ends of the superconducting layers; leads electrically connected to the ends of the respective superconducting layers; and an insulating member (bushing) disposed around the peripheries of the leads, the insulating member sealing the refrigerant in the refrigerant tank [claim 1], wherein a sleeve (outer conductor connection, corona ring) composed of a conductive material is disposed

covering the outer periphery of each superconducting layer and electrically connected to the superconducting layer, and each lead is attached to the sleeve [claim 2].
